

SOLAR ENERGY STORAGE

SOLAR ENERGY STORAGE TOWER SYSTEM

GFS-200/300/600-ES

In remote, off grid areas where the weather is tough and unpredictable, you need more than just light from your lighting system. You need a back-up plan for when extreme weather kicks in and your mains power kicks out. Introducing GFS 300 and 600® ES series of Advanced Energy Storage Systems. Robust, impact resistant vandal, corrosion and tamper proof solar panels mounted on a 6-meter pole. Built for industrial spaces, highway underpasses and tunnels. It's standalone energy storage capability makes it the most efficient, ultra-reliable energy storage systems for remote and off-grid locations. Tough • Impenetrable • Powerful

SOLAR LIGHTING INNOVATION

GFS-200/ 300/600-ES

200W / 300W / 600W

FEATURES

- Smart Connected Compatibility ✓
- Cyclone Weather Rating ✓
- Intelligent Battery Management System (BMS) ✓
- Durable Construction & Components ✓
- Fully Galvanized Reinforced Steel ✓
- Maximum Power Point Tracking (MPPT) ✓
- Zero Maintenance System ✓
- 12 to 48 VDC Output ✓
- In Built Lightning Surge Arrestor ✓

BENEFITS

- Extreme Weather Resistance ✓
- Safe Consistent performance & lifespan ✓
- Impact Resistant, vandal proof ✓
- Ultra Reliable. Built to Last ✓
- Fully customer endorsed ✓
- Protected against extreme weather ✓
- 100% Australian Product ✓
- Unrivalled output regardless of weather ✓
- Ultra Reliable - No Running Costs ✓

APPLICATIONS

- Mobile Repeater Stations ✓
- Pumping Stations ✓
- Lighting Systems ✓
