

### Mobile Yard Lighting | Followmont Transport Depots Cairns - Woree, QLD | Mackay - Paget, QLD

#### BACKGROUND

Followmont Transport completed construction of their new Cairns and Mackay depots in late 2019. As part of an ongoing commitment to operating in an environmentally conscious manner, Followmont ensured that both new depots design and development were focused on reducing our carbon footprint, whilst still performing at full capacity. This focus drew our attention to solar lights.

#### OUR SOLUTION

As a transport depot, Followmont is operating 24/7. The concrete base design with forklift tine spaces provides the ability to easily relocate a light source with a forklift. As a result, our depots can utilise areas of the yard which awning mounted flood lights wouldn't sufficiently illuminate. Additionally, with operational requirements changing daily, mobile lights have provided workspace flexibility that fixed light poles would have otherwise inhibited. The hinge plate design of the lights a simple and efficient set up, which was completed within hours.

- Product Supplied in Mackay: 5 x GFS-200 Solar Street Lights
- Product Supplied in Cairns: 2 x GFS-200 Solar Street Lights

#### RESULTS

**Testimonial** "Simon from Green Frog Systems was a standout from all other providers that were contacted when seeking quotes. Throughout the process, we were kept up to date on the progress of our lights and all items were delivered with urgency. The consistent level of service provided by Simon will keep Green Frog Systems as our go-to for any solar light needs across our depots." *Brooke Tice - Project and Property Coordinator*
